ABOUT CRYPTO

There are many avenues to hear about the crypto market and what crypto is. There is excitement around the possibilities with legitimate use cases as well as social misinformation to drive profits by scammers. It is difficult to sift through the noise to understand what the crypto market really is.

Starting with the foundation of what blockchain technology is, how crypto currencies compare to traditional stocks, and outlining some of the major challenges and risks found within this market will show why our strategy is setup to win.

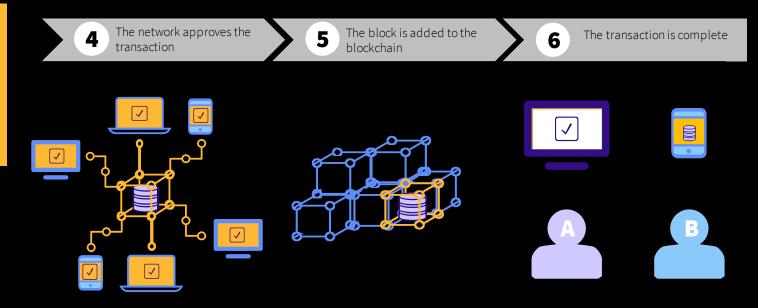

3

WHAT IS BLOCKCHAIN TECHNOLOGY

Blockchain technology was created to offer a decentralized system for transactions that would prohibit fraudulent transactions.

Cryptocurrencies utilize blockchain technology to ensure that every transaction is validated and that the 'network' approves that the transaction is authentic. This prevents fraud and protects all parties to the transaction.

CRYPTO VS STOCKS

The crypto market has similarities with the stock market with some key differences. One major difference is maturity of the market and another is the potential use of what you purchase and have possession of.

CRYPTO

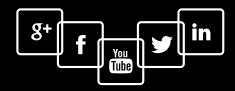

Represents a **currency**that can buy other things or be **transferred back to dollars**

You are investing in a **new technology** called **blockchain**

Since the technology is in its **infancy**, the market is **volatile and full of opportunity**

STOCKS

Represents **equity in a company** that may earn dividends and sold for dollars

You are **investing in a company** and their future

The market is more **mature** and **predictable** in comparison

TODAY'S CRYPTO IS LIKE THE LATE 90s INTERNET

CRYPTO COMPLEXITIES

The crypto markets are extensive and complex. Not only does it take technical skills to really profit from the current volatility, but it also takes patience and measuring risks.

A B O U T C R Y P T O

CRYPTO = WILD WEST

OPPORTUNITIES ABOUND & RISKS ARE EVERYWHERE

Immense return potential Fast growing market New use cases keep arising Scammers and fake coins Volatile market conditions Government unknowns

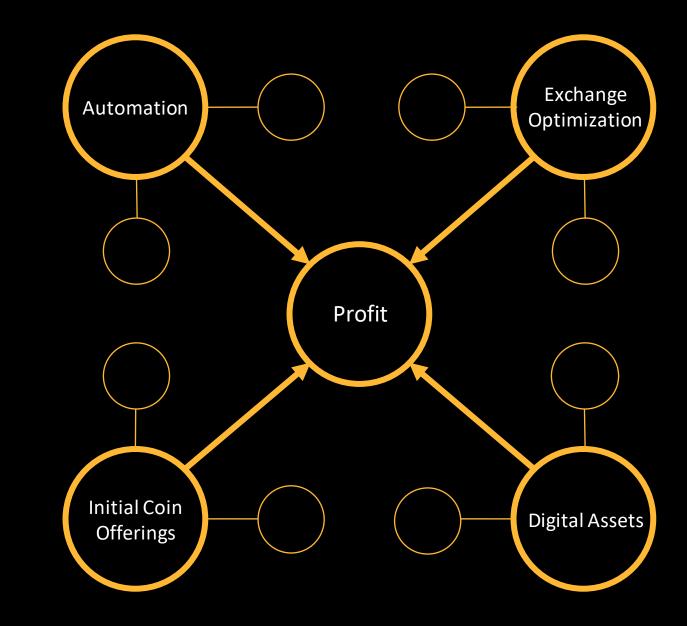

OUR Strategy

Imagine being able to invest in Google when they started their search engine called Backrub that was the first way to organize links and information on the internet or Amazon when beginning with book sales that disrupted all physical book sale retailers.

This Crypto market is like the internet in the late 90s. Most of the current market will not exist or look the same in the future, there is a ton of opportunity, and we will be in the market to have the pulse of what is coming as well as take advantage of the current volatility as the market matures.

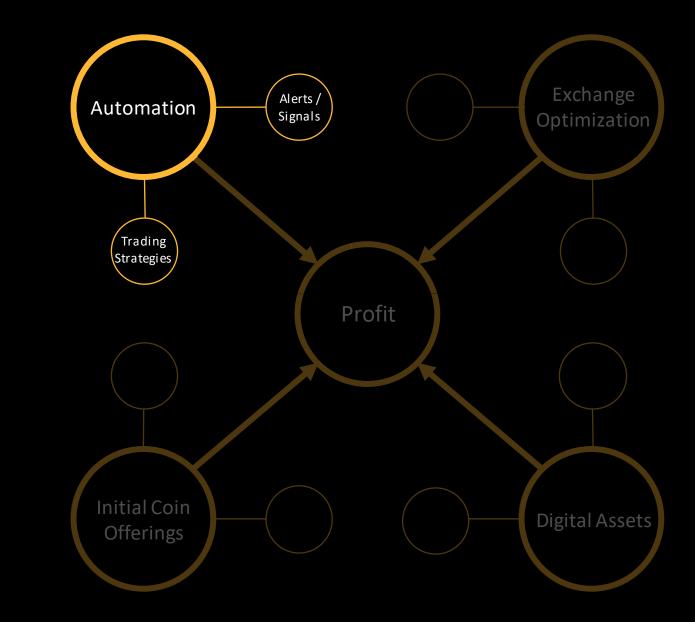

OPPORTUNITY IN MARKET

There are many layers to our opportunity in the market. We will leverage the wild west nature of this market and the multiple layers of complexity to win.

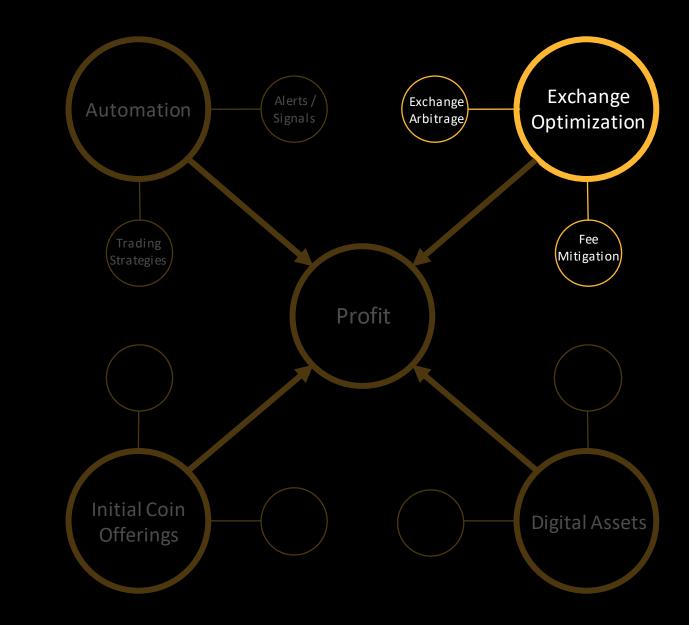

AUTOMATION

Speed and agility are key when dealing with the current state of the crypto market. In order to capture opportunity, we will leverage bespoke automations to quickly and efficiently find and capitalize on opportunity while reducing human error.

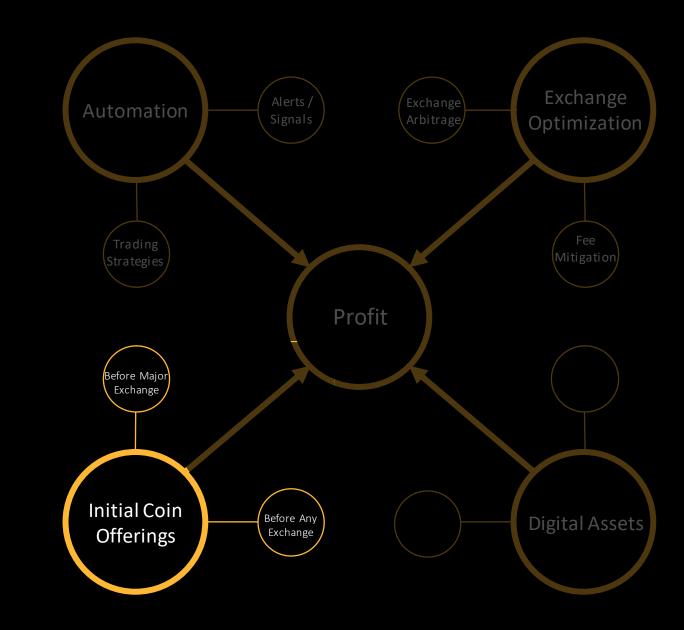

EXCHANGE OPTIMIZATION

Exchanges have variations that need to be considered in our model ranging from various fees, differing price per coin between exchanges, varying volume of coins on each exchange, and government restrictions that can change rapidly.

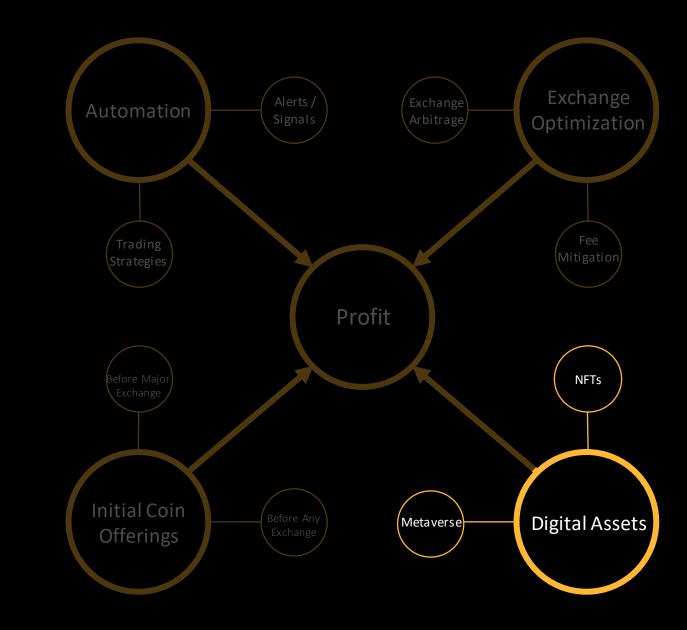

INITIAL COIN OFFERINGS

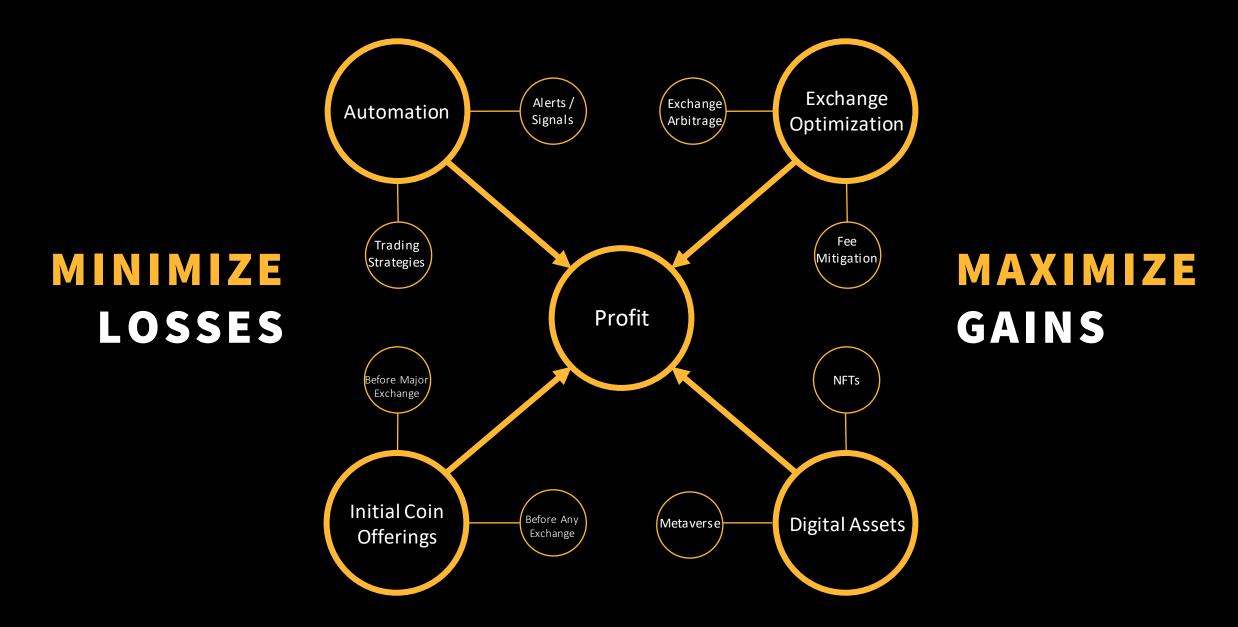

Like IPOs, ICOs are new coins to the market. This strategy has two facets, purchasing coins that are completely new to the market, before listing on any exchange, or relatively new to the market, before being listed on any major exchanges.

DIGITAL ASSETS

As the blockchain builds way to what many are calling the metaverse, digital assets will also become more prevalent. NFTs are the first major instance of this new asset class and part of the strategy will be keeping a pulse on this growing opportunity.

WHY NOW

As the technology continues to mature and governments grasp how to handle this new market, it will begin to stabilize and promote more innovation. During this time of high volatility and the formation of what will become the future of crypto, now is the time to get involved.

In order to see where the market is going, it is important to be a part of the waves and new structures for finding information. This market is not traditional and by the time major news picks up stories about crypto, it is often too late to take action. This market is run through Twitter, Telegram, and Discord to quickly pass information. Now is the time to be plugged in and capitalize on the opportunities.

ADOPTION CONTINUES TO GROW

According to a July 2021 report by Crypto.com 221 M people are using cryptocurrencies which is up from 106 M in Jan 2021.

221,000,000 USERS OF CRYPTO

\$1,630,000,000,000 CURRENT MARKET CAP

Source: https://blog.crypto.com/global-crypto-users-over-200-million

CRYPTO IS GOING MAINSTREAM

Governments, financial institutions, and major brands are starting to pay attention to crypto and get involved.

- Chase, Standard Chartered, and BNY Mellon are among many banks that have invested in and hold crypto currencies.
- Fidelity, Morgan Stanley, and Goldman Sachs have started buying and offering investments in crypto currencies
- Tesla and Square are among the first companies to purchase and own crypto currencies on their balance sheets as assets.
- Disney developed its own blockchain protocol and has also started an NFT project in November 2021.
- El Salvador has declared Bitcoin legal tender and is planning the first "Bitcoin City"
- There are Bitcoin rewards credit cards

Sources are in the Appendix

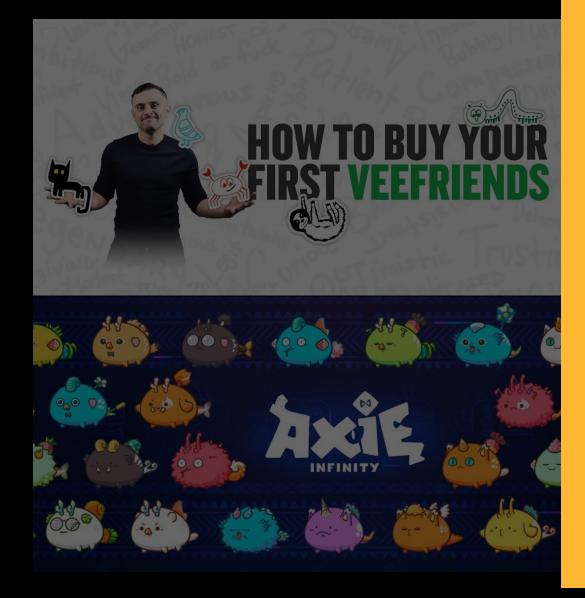

THE NFT (non-fungible token) MARKET

NFTs are the beginning of mixing real assets and crypto. Many think about the art world as the NFT market but miss the nuances of what others are doing that can add value beyond ownership of digital art.

Gary Vee: He launched an NFT project that has real world benefits. His project is called VeeFriends and each of the NFTs come with things like access to his conference or periodic calls with him.

Axie Infinity: A popular NFT driven game where you can battle and earn new NFT creatures that can then be sold on their market

WHY NOW

THE FUTURE: METAVERSE

Ready Player One and Wreck It
Ralph 2 did a great job of
helping visualize what the
concept of the metaverse is.
A place where in game
currency earns crypto
currencies

- VR land owned and operated by various brands
- A fully VR / AR world to be explored and built
